

## Prepare Your Firm for Business Continuity Incidents Business Continuity for iManage Work and NetDocuments

Prosperoware CAM, a cloud-based platform for Privacy and Regulatory Compliance for content systems, provides the most comprehensive solution to firms' most pressing privacy and cybersecurity concerns. With its Business Continuity feature set for on-premises (iManage server 10.2+) and cloud systems (NetDocuments and iManage Cloud), firms gain the ability to have ready access to important content in case of any incident.

Business Continuity was designed to address (a) the need for firms to have business continuity in place to ensure privacy and regulatory compliance, and (b) provide firms with rapid access to documents in case of outage (due to cybersecurity issues, internal server issues, or cloud systems).

### KEY FEATURES:

- ✓ Rapid business continuity access through one-time password (OTP)
- ✓ Ability to sync documents metadata and security from on-premises (iManage 10.2 server or above) and cloud (NetDocuments and iManage cloud), to CAM
- ✓ Control over security – clients store documents in their own AWS cloud for enhanced security
- ✓ Configurable profile forms to search documents for selected criteria (clients, matters, names, date ranges, or metadata specifications)
- ✓ Effortless profile search and document download in case of outage
- ✓ Document check-in when systems are back online

The screenshot shows the 'Documents' search interface. At the top, there are several filter fields: Client (MICROSOFT (Microsoft)), Matter (103), C28 (checkbox), C17, Status, C21 (Operator), Document Name, and Created Date (Operator). Below these is a 'Search' button and a 'More Search' link. The results section is titled 'Document Search Results' and shows '12 results'. A table displays the following data:

FileType	client	Matter	c28	c17	status	c21	Document Name	Created Date
PDF	MICROSOFT	103			ACTIVE		158_1	28 August, 2019, 3:16 PM
PDF	MICROSOFT	103			ACTIVE		352260_2	28 August, 2019, 3:16 PM
PDF	MICROSOFT	103			ACTIVE		SecurityTestEXC	28 August, 2019, 3:16 PM
PDF	MICROSOFT	103					testdocument2delete	28 August, 2019, 3:16 PM
PDF	MICROSOFT	103					testsheetdeketete	28 August, 2019, 3:16 PM

“CAM offers business continuity for iManage server 10.2 and above on-premises, NetDocuments and iManage Cloud.”

## Prepare Your Firm for Business Continuity Incidents

### Business Continuity for iManage Work and NetDocuments

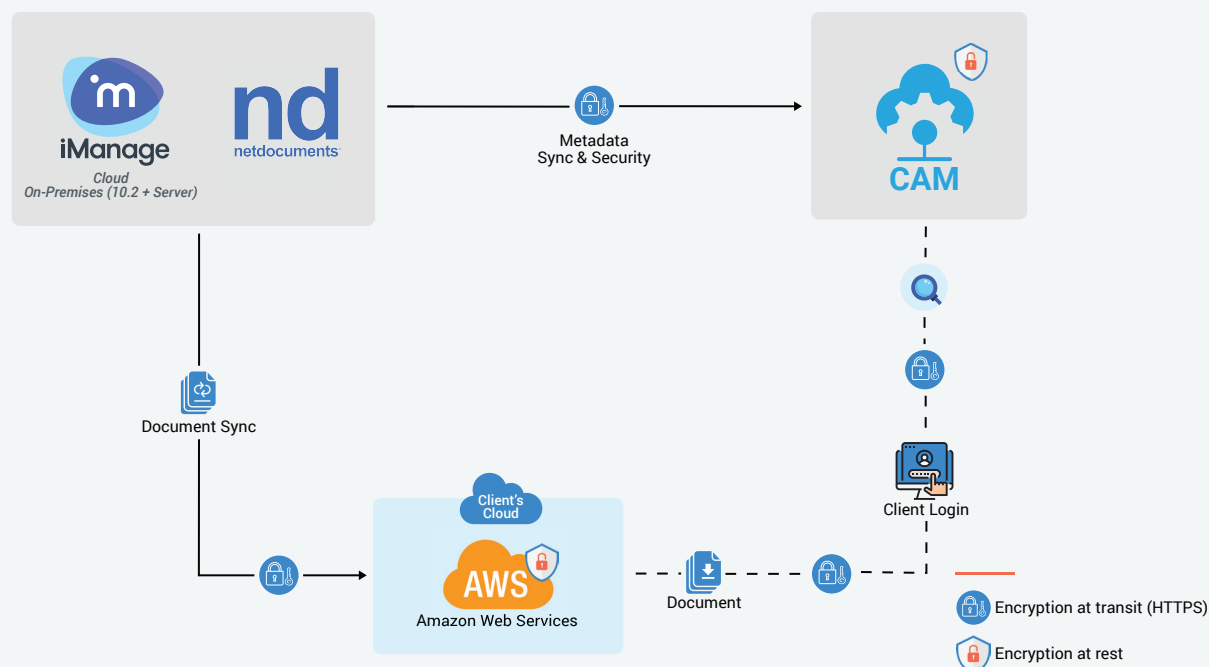

Prosperoware CAM Business Continuity offers an efficient solution addressing privacy and regulatory concerns. It enables firms to store a copy of their DMS documents in their own AWS cloud instance, with the metadata and security stored in CAM.

Business Continuity ensures data access is carried out in the least invasive way based on permissions. Users with admin privileges in CAM are able to see and access all documents, while role-assigned users, can only see documents as permitted by their assigned access level.

#### KEY BENEFITS:

- Effortless access to important and time-sensitive firm and client work product
- Enables firms to have tested business continuity plans
- Less resource and time-consuming business continuity assurance
- Adherence to privacy and regulatory requirements

#### SEAMLESS WORKFLOW EXPERIENCE

“Prepare your firm against ransomware with CAM business continuity.”
