About Us

We are a thought-leading software enterprise company for a digitized world. Our core competency is our expert understanding of enterprise systems, data and processes in organizations, and building technology for transformative change. We develop software for privacy and regulatory compliance for content systems, and financial matter management.

Job Description

The .NET developer is expected to build software using languages and technologies of the .NET framework, to create applications from scratch, to add features and bug fixes to existing appliations.

.NET Developer should be able to write functional code with a sharp eye for spotting defects, to be a team player and excellent communicator. The .NET Developer's primal goal will be to work with internal teams to design, develop and maintain software.

Job Responsibilities

- Producing code using .NET languages (C#, VB .NET)
- Upgrading, configuring, and debugging existing systems
- Participate in requirements analysis
- Collaborate with internal teams to produce software design and architecture
- Write clean, scalable code using .NET programming languages
- Test and deploy applications and systems
- Revise, update, refactor and debug code
- Improve existing software
- Develop documentation throughout the software development life cycle (SDLC)
- Serve as an expert on applications and provide technical support
